

**Request for Clinical Experience Placement**  
**PHY 209 – Introduction to Teaching High School Physics**

Over the past few years, the ISU Physics Teacher Education program has grown dramatically. As a result, we have far outstripped our ability to place prospective teacher candidates in local high schools for their Service Learning Project with cooperating physics teachers. We, therefore, need to think “more broadly” as far as clinical placements are concerned.

I’m asking you to provide a name and contact information of physics or physical science teacher who you believe might be willing to allow you to make clinical observation and interactions in his or her classroom. If you think that there is such a teacher in your home community, or in a community where you someday would like to teach, please provide the following information. Please do not contact the teacher or anyone else in the school about the possibility of clinical experiences; merely provide the requested information to the course instructor. Your instructor will take care of making the arrangements if such a placement is possible.

Do you have a car that you can use to travel to and from a clinical placement site? \_\_\_\_\_

Your name: \_\_\_\_\_

Teacher’s name: \_\_\_\_\_

Teacher’s e-mail address: \_\_\_\_\_

Teacher’s school name: \_\_\_\_\_

School street address: \_\_\_\_\_
