

Lesson Study Report Guidelines

Physics 311 Illinois State University Fall Semester 2011

This report should address clearly and concisely the overall question, "What did you learn as part of the Lesson Study Process?" In this essay you will prepare detailed answers to the following guidelines and/or questions:

1. Document in detail the Lesson Study Process. Explain what happened/what was accomplished/was decided in each of the meetings preparatory for the teaching of the lesson.
2. Provide your observations and reflections on the lesson taught.
3. Explain what you learned about lesson planning as a result of this process.
4. Explain why and how the lesson plan was revised for later re-teaching.
5. In an appendix, provide detailed original and revised lesson plans for the original lesson/lesson as it would be re-taught.

In addition, your essay must satisfy the following general criteria:

- * Paper is typed double space, using a 12-point Times font or similar
- * 1-inch borders maximum on top, bottom, and sides of paper
- * 6-8 pages in length (not including the appendix)
- * Makes appropriate use of grammar
- * Logically presented
- * Shows evidence of reflection
- * Accurate and detailed
- * Clear evidence of the use of documentation to describe Lesson Study process.
- * Turned in on time (25%/day penalty for each school day late)
